

# Issue secure credentials that are easy to access and verify online

Diwala is a **SaaS platform** that enables fast and secure issuance and verification of digital certificates and credentials for both **people and businesses**. Safeguard your institution’s reputation; Sign and issue thousands of credentials at once using **authentic digital signatures**.

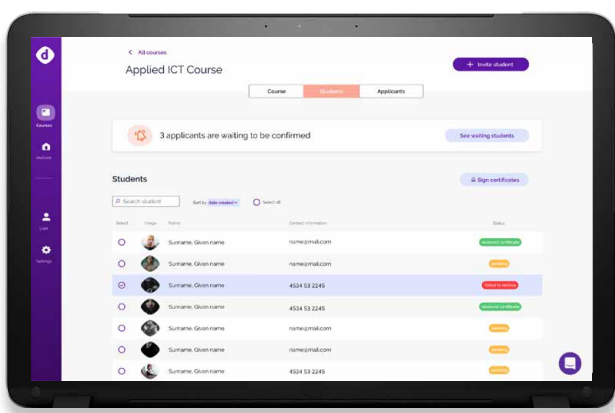

The platform allows anyone to **verify credentials**, safely knowing the information comes directly from the issuing organization. By utilizing **blockchain technology**, Diwala optimizes data sharing without compromising security and challenges invalid certification and verification processes.

Diwala’s **Digital Identity Wallet** gives people and businesses a more secure and flexible way to store and share information. The credentials are retrievable even if the PDF, phone or device is lost.

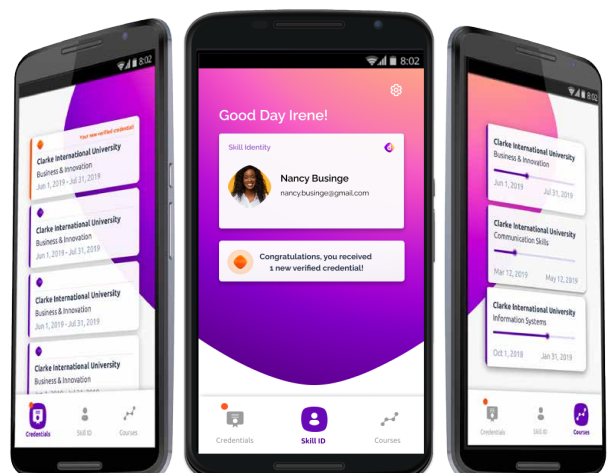

Start a more efficient and secure credentialing process today at [www.diwala.io](http://www.diwala.io)!

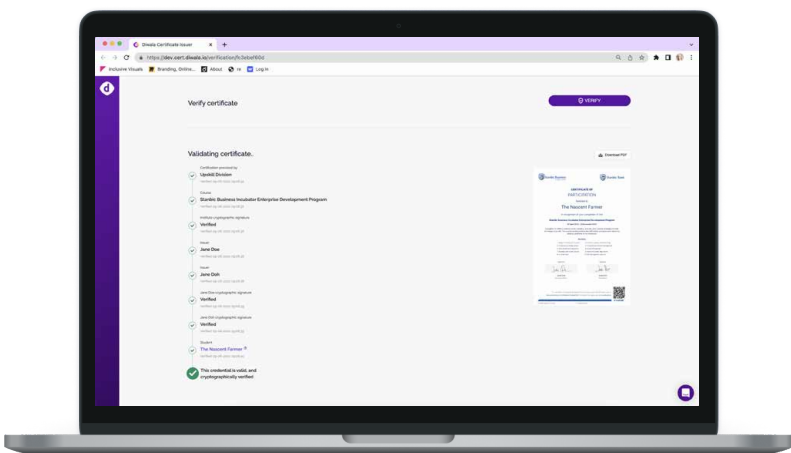

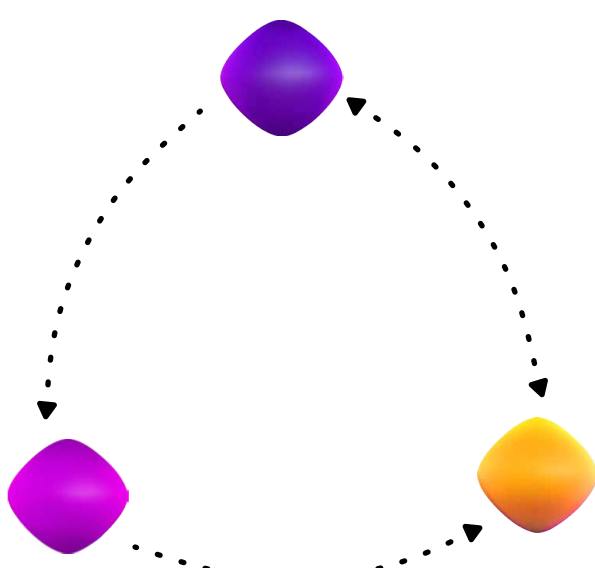

## Solution

**Institutions and Organizations** need to issue secure and verifiable proof of information more efficiently.

**People** need a safer and more flexible way to access, control and share their verified information.

**Organizations** need a simple way to connect, request and verify secure information from a person or a business.

## Adapt to the future of digital credentialing with the Diwala platform

Maximize verification profit and data insight

Combat invalid certification and verification processes

Reduce cost of certification and verification processes

Reduce time spent on verification from 3-6 months to 3-12 seconds

Enable more opportunities for people worldwide

## Development Partners

"To the SMEs in Uganda, this technology will allow agility, trust, scale and much more, contribute to saving the environment. It is our continued hope that these digital certificates will be adopted by many more certificate issuing entities in the country for a better future. Any support rendered to the team and company to further its goals and dream will come highly recommended and needed."

**Joel Bamwise**  
Programmes Manager, Stanbic Business Incubator

"The platform has enabled us to adapt to the challenges presented by COVID-19 which pushed us to conduct our training as well as issuance of certificates online. The platform has greatly improved the efficiency of our certification process. Our trainees appreciate that they can now access their original digital certificates anywhere which can also be verified quickly by potential employers they approach. The platform has been of great value to us and has now also been adopted by our sister teams in other countries like Kenya, Zimbabwe and Botswana."

**Diana Ninsiima Kibuuka,**  
Project Girls for Girls Uganda

"The biggest advantage of the Diwala solution is that the diplomas cannot be altered. Our customers are both large banks and the public sector such as courts and police, and our reputation depends on a watertight system. We simply cannot risk false testimonials with my signature."

**Emmanuel Chagara**  
CEO, Milima Cyber Academy

We are building an **economy of trust** that helps foster digital inclusion, with its opportunities, to every citizen of the world.
